This report shall not be reproduced, unless in its entirety, without written approval from Labstat. This report is an analytical certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived otherwise. Void after 1 year from test and date. Carelessness of content of batch material may vary depending on sampling error. IC=In-control QC parameter; NC=Non-controlled QC parameter; ND=Not Detected. ND=Not Detected, generally the limit, ppm=Parts Per Billion. Level of Detection (LOD) and Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. Reproducibility of two measurements. Action Levels are State-determined thresholds variable based on uncertainty of measurement (UM) for the analyte. The UM error is available from the lab upon request. The "Decision Rule" for the pass/fail does not include the UM. The limits are based on F.A. Rule 64-4.314.
