The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived otherwise. Void after 1 year from test end date. Calculated content of batch material may vary depending on sampling error. ICH control QC parameter; ICH Non-controlled QC parameter; ND=Not Detected. Material Analyzed, represents the Millon, gram parts per Billion. Levels of Detection (LOD) and Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. Reproducibility of test measurements. Action levels are State determined thresholds variable based on uncertainty of measurement (UM) for the analyte. The UM error is available from the lab upon request. The "Decision Rule" for the pass/fail does not include the UM. The limits are based on F.S. Rule 64-4.331.
